Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 May 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 94, 108, 109 and 117-120 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 94, 108-109 and 117-120 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.

DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/24/05 has been entered.

Claims 94, 108-109 and 117-120 remain pending in the application and were examined on their merits.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1655

Claims 94, 108-109 and 115-120 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sananaka et al. (1995) or Masahiro, H (1995) or Zhang et al. (1995) or Tamiko et al (1994) for the reasons of record.

Applicant's arguments were fully considered, but not found persuasive.

Applicant's principal argument resides in the contention that the experiment relied on in the Declaration submitted 2/28/05 is distinct from the method as disclosed by Zhang et al. and therefore the data is significant and displays an unexpected result.

However, as indicated in the Addendum to the Advisory Action, the data is inconsistent in that it shows that 10mg/kg/day and 40mg/kg/day showed no infarct volume decrease wherein Zhang et al. clearly showed a decrease in infarct with the same amounts of Rb-1. Applicant argues that the difference between the experiments is that Applicant administered the Rb-1 after infarction and that Zhang et al. show only administration prior to infarction. However, this is respectfully found incorrect. Zhang et al. clearly teach that "Rb₁ 10-40 mg/kg iv before and after reduced the IS by 20% - 49% and 12-35% respectively" (IS = infarct size) (p. 46, second paragraph). Zhang et al. further comment that " Rb₁ 20-40mg/kg iv before ischemia was more effective than after ischemia". Therefore, it is not understood why, the data as presented in 'Figure 3' shows that 10/mg/kg/day and 40mg/kg/day administered after infarction has virtually no effect on IS, when it is clearly shown by Zhang et al. that these amounts have a

significant effect on infarction. Therefore, the data/Arguments still do not convincingly demonstrate any unexpected results.

Further, it remains deemed that wherein the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 220 F2d 454,456,105 USPQ 233; 235 (CCPA 1955). see MPEP § 2144.05 part II A.

No Claims are allowed.

This is an RCE of applicant's earlier Application No.10/070,209. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1655

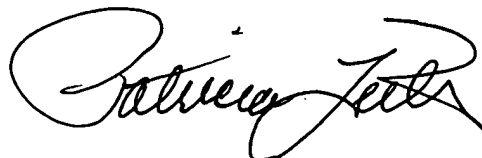

the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
